Company profile: Flow Sight Glass for piping

Since 1976 the Kohler GmbH Company's main activities have been in the development and manufacture of high-quality process of glass production. Kohler GmbH is your reliable partner, when it comes to flow sight glass for piping. The glass ring allows an excellent observation of the flow from all sides.

The patented development for the flow sight glass for piping for fitting between flanges are offered in different models for different working conditions.

Manufacturing- / delivery programme:

A Flow Sight Glass is produced with 25-, 30- or 50 mm pipe-view length.

Temperature up to 80°C / 176°F	low-cost design high resistance to chemical resistant to aggressive chemical resistant to aggressive chemical	Acrylic Glass
Temperature up to 150°C / 302°F		Soda-lime Glass
Temperature up to 300°C / 572°F		Borosilicate Glass
Temperature up to 1100°C/ 2012°F		Quartz Glass

The sight glass is fitted between two flanges (DN/OD 10 – 1000). The wall thickness is equivalent to the raise face of the flange so that flow sight glass has no dead spots.
