

Always. Reliable. Tight.

CHEMICALS REGULATION ACCORDING TO REACH

The new EU Chemicals Regulation No. 1907/2006 REACH went into effect in June 2007.

Since Hauff-Technik products are “products without intended release” according to RIP 3.8, we are not subject to mandatory registration – rather we are only required to provide information according to Article 33 of the regulation.

As a downstream user, we have contacted all of our suppliers regarding the pre-registration and/or registration of the materials used, in order to guarantee continued availability of the raw materials and products used in the future.

As soon as we are informed of changes relative to availability, of course, we pass that information along to our customers immediately.
