Company profile:

The company Hildebrand Rohrtechnik is concerned since 1984 with distribution and designing special machines for the repair and cleaning of any kind of pipes.

The company is specialised for extreme cases of cleaning of completely sealed plants and also of exemption of extended rigidities, material build-ups, unwanted products of chemical reaction, etc.

Is a consultant and partner in situations, in which frequently only the solution of complete rehabilitation appears, that is still very expensive. With the right know how and customized individual solutions we often are able to save valuable production time. This directly means to eliminate the costs and losses.

Manufacturing- / delivery programme:

Special Machines

As a user we work with the biggest and best companies in the field of ultra-high-pressure water for many years, and we are official sales representative for the most of these companies. We can offer you ways for the modification of tools and plants according to your particular requirements.

Special services (Water-highest-pressure-work)

Our special services includes industrial cleaning work with a high water performance at pressures of 2850 bar. The most frequent applications are completely sealed pipes in areas which are difficult to access.

Shaft Renovation

- complete refurbishment concepts
- for great depths with significant groundwater ingress
- solutions for no longer permitted climbing aids and dry streambeds
