

Vertical in-line volute pump **TPE3**

TPE3 vertical in-line volute pumps are used in commercial buildings for air conditioning and heating applications.

The pumps are all single-stage, in-line centrifugal volute pumps with standard motors and mechanical shaft seals. The pumps are of the close-coupled type, i.e. pump and motor are separate units. Consequently, the pumps are less sensitive to impurities in the pumped liquid than similar pumps of the canned rotor type.

Features and benefits

- Optimised hydraulics for high efficiency
- Reduced power consumption
- High-efficiency motors
- TPE3 pumps are fitted with high-efficiency motors
- High-efficiency motors provide reduced energy consumption
- Top-pull-out design

Grundfos is the world's largest pump manufacturer, based in Denmark, with more than 18,000 employees globally. Grundfos was established in 1945 in Bjerringbro by the late Poul Due Jensen.

With an annual production of more than 16 million pump units, Grundfos is one of the world's leading pump manufacturers. Circulator pumps for heating and air-conditioning and other centrifugal pumps for industry, water supply, waste water and dosing are the major products. Today, Grundfos is the world's largest manufacturer of circulator pumps, covering approximately 50 percent of the world market for these pumps.
