### **Company profile:**

Since 1995 KMR Service GmbH has specialized in manufacturing long-distance heat plants. The equipment and service delivered are characterized by the highest possible level of quality and reliability.

In addition to providing long-distance heating plants KMR offer services with regard to retroactive insulation and plastics welding for pipe and container construction.

KMR Service GmbH is certified according to the long-distance heat consortium criteria FW 605, thus guaranteeing that they are working in line with the relevant quality standards. KMR staff has obtained all required permissions for the fitting of sleeves and plastic welding.

### **Manufacturing- / delivery programme:**

#### **1. Local- & long distance heating pipelines**

- rigid plastic casing pipe (single and double pipe)
- flexible plastic casing pipe with steel service pipe
- flexible plastic casing pipe as PEX- pipe (single and double pipe)
- Spiral duct/ Spiro pipe (single and double pipe)

All pipe systems are being manufactured according to the relevant German standards and can be delivered with all usual insulation levels. The pipes can be fitted with any required monitoring systems and can be delivered in lengths of 6, 12 or 16 m.

#### **2. Services for district heating systems**

KMR Service GmbH has all frequently required parts for long-distance heating on stock and can supply them at short notice.

##### **2.1 Subsequent Insulation**

- for ground-fitted plastic casing pipelines (manual and machine foaming)
- for fittings of any brands which are to be laid into the ground
- insulation and installation of all commercially available leak detection devices

## 2.2 Trading

Seit 2005 arbeitet die KMR Service GmbH mit der Firma ZPUM, einem leistungsstarken polnischen Kunststoffmantelrohrhersteller zusammen. Die angebotenen Rohrsysteme sind an deutschen und westeuropäischen Prüfinstituten geprüft und entsprechen den Normen nach EN und DIN. Die KMR Service GmbH hat das alleinige Vertriebsrecht der Produkte von ZPUM in Deutschland.

## 2.4 Defect location and revisions for district heating systems

- plant inspections and maintenance works
  - inventory of the actual, current plant status
  - inspection and fault location by all leakage warning systems that are usual in the market
  - dokumentation of the actual real run piping and leak detecting systems
  - reworking of problems related to missing documentations
- ## 2.5 Thermographic check
- Thermographic check of district heating systems

## 2.5 Thermographic check

- Thermographic check of district heating systems

## 3. Bioenergy, biogas plants and agriculture

- construction of biogas plants in various sizes and configurations
- calculation and structural analysis
- supply of district heating lines, tanks and insulation
- pest control: rodent control, disinsectisation and disinfection of holdings and equipment

## 4.0 Plastics processing & manufacture of reservoirs, tanks and containers

Die KMR Service GmbH fertigt Kunststoffbehälter entsprechend der vorgesehenen Planung entweder auf der Baustelle oder in der Werkstatt. Auf Wunsch wird dazu auch eine entsprechende statische Berechnung geliefert.

Wir können mit unserer modernen Plattenschweißmaschine Behälter in allen Dimensionen mit Wandstärken bis 20 mm fertigen. Weiterhin fertigen wir zum Beispiel Wannen, Kästen, Profile, Sonderbehälter, Kondensatschächte, Auffangwannen und Schwimminseln.
