Company profile:

The NORO company's piping and distribution systems are used in a wide variety of applications, for instance: automotive industry, ventilation and extraction systems, biological filter systems, chemicals industry, grain and feed processing, food industry, pharmaceuticals industry and environmental technology.

The NORO range of products includes a standard assortment of steel (powder-coated or galvanized) and chrome nickel steel pipes, machined parts and distribution systems with diameters ranging from 80 to 600 mm as well as the corresponding pipe connector elements. Besides the catalogue products, NORO offer to provide customized products in response to customer requests.

NORO's long experience in sheet metal works and their state-of-the-art production technology (3D-pipe cutting unit, high capacity cutting plant, remodeling tools and equipment) ensure the highest level of reliability and precision.

NORO partner companies are at your service across all Europe for fast and efficient assembly of complete pipe systems.
