Company profile:

C-deg provides customized solutions for ecologically friendly treatment of all greenhouse gases, worldwide. Gases released from industrial and biological processes that cannot be used for other purposes, require flaring according to the state of the art.

We use latest generation materials, state of the art burner and combustion chamber technologies, and intelligent system control and monitoring concepts to supply our customers with highly energy and cost efficient process technology.

Manufacturing- / delivery programme:

Membrane plants in containerized or skid design
for treatment of leachate or salty industrial sewage

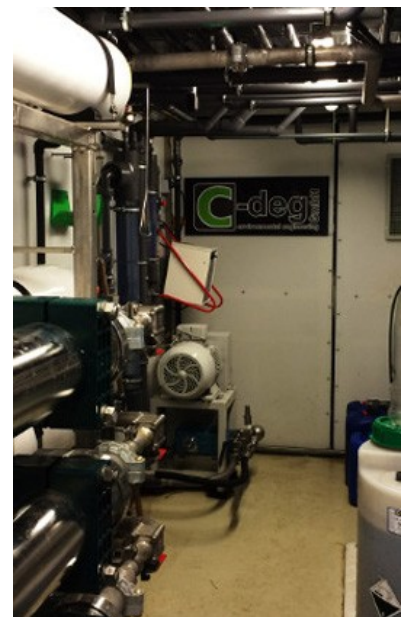

- Rental of membrane systems
- Service and upgrade of existing membrane systems
- Diagnosis of problematic operating conditions for existing systems.

C-deg supplies ground flares for a variety of applications:

- **Flares for oil associated gas and flash gas**
- **Flares for industrial process technology**
- **Flares for biogas and landfill gas**
- **Flares for pyrolysis-, syn- and wood gas**
- **Flares for lean gases and industrial exhaust air**
- **Flares with integrated heat recovery**

- **Gas blowers and booster stations**
- **Mobile flares and rental flares**

For applications that only require a flare for a short period or for customers who must be capable of flaring at several sites not simultaneously, C-deg offers a variety of mobile flare types, as low or high temperature versions.
