

ELYSATOR trio

Effective corrosion protection for small & medium heating-/cooling systems

The ELYSATOR trio is the only corrosion protection system on the market separating gasses, absorbing acids and filtering sludge particles at the same time.

In such manner, valuable components can be protected and malfunction of the hydraulic action in a recirculation water system can be avoided.

Preferred applications:

Domestic heating and cooling systems up to approximately 1'500 litres of water content.

If you have any questions, please do not hesitate to contact us.
