

XPECTION - The seeing sewer cleaning nozzles!

Efficient and economically viable channel cleaning system.

Thanks to XPECTION, your sewers are safe and clean and the condition of the pipe can be easily checked. Save time, money and resources - Inspect only what needs to be inspected – and save expensive subsequent cleaning during TV inspection.

Wireless communication technology
Live video images
Modular system design
Minimum set-up time

The XPECTION sewer cleaning system enables municipalities, service providers or sewer network operators to continuously monitor the cleaning process.

The XPECTION has a modular design and is cordless - so it can be attached to any flushing vehicle without any set-up effort. The biggest difference for customers is between getting a live image from the shaft or having a video for download. The configuration can be adapted to the customer's needs at any time.

Recording of HD images and commenting

Operational benefits by using HD live images:

- Saves water due to cleaning on demand.
- Detects and records sewer damages for subsequent channel inspection
- Prevents road break-ins by early detection of sewer break-ins
