

AQUARIWA Flood Protection 150 - Made in Germany

This mobile flood protection system guarantees protection up to a height of 100cm with a freeboard on 50cm. With the additional use of sand or gravel to increase the weight, the protection can be extended to the total height of 150 cm. Furthermore, the system offers resistance against vandalism.

Special sizes or special shapes can be realised upon request.

Multifunctional Use - AQUARIWA is versatile

Apart from flood protection, the system can also be used as, an extinguishing water barrier, an extinguishing water depot, a safety barrier for bomb disposal or dangerous goods accidents and more.

If you have any questions, please do not hesitate to contact us.

The constantly rising water levels of rivers, lakes and streams pose an increasing threat of floods every year. The annual cost of flood damage is hundreds of millions. The AQUARIWA Flood Protection System has been developed to enable a faster response.

We offer the flood system with guaranteed minimum protection heights of 100 cm, 80cm and 50 cm. When correctly assembled, a higher protection height than the guaranteed minimum can be obtained.
